

Montags-Diskussionsrunde, Institut für Biometrie und Klinische Epidemiologie
Beginn: 10:00 Uhr

| Termin | Thema |
|------------|---|
| 15.10.2018 | Comparing apples and oranges? Should propensity scores be used for matching? |
| 22.10.2018 | Performing multiple comparisons on clustered and overdispersed count data |
| 29.10.2018 | Homogeneity analyses in basket trials |
| 12.11.2018 | Scores for sample size recalculation in adaptive group sequential clinical trials |
| 19.11.2018 | BMBF and DFG Call "Clinical Trials"- How to set up statistics & co |
| 26.11.2018 | Interpretation of significance - From Aristoteles to Bayes |
| 10.12.2018 | Using Lasagna Plots for long-term disease trajectories of continuous data |
| 17.12.2018 | A Bayes approach to Mixed Treatment Comparisons. Practical guidance for performing Bayes statistic with OpenBUGS. |
| 14.01.2019 | Biometry in approvals of the local ethics committee and animal studies: aims, examples, questions |
| 21.01.2019 | Nonparametric models for longitudinal data in SAS and R |
| 28.01.2019 | BeLOVE: First experiences of a large prospective cohort study |
